RE: Olin, North Little Rock, Arkansas Site

Dear Mr. Anderson:

During the meeting held in Dallas on August 17, 1983, the State of Arkansas agreed to provide Olin with specific requests for additional information relating to hydrogeological determinations made by Olin. It is now my understanding that E.P.A. has received a Draft Closure Plan for the North Little Rock facility. E.P.A. has prepared a response to the Closure Plan and we have reviewed that response. Consequently, we would like to defer any further comments until at such time as there has been a response to the letter from E.P.A.

Sincerely,

Cheryl J. Terai
